Relevant Experience

Full Stack Web Developer · V-tech 2022 - 2025

- Developed ERP systems using C# ASP.NET MVC/Core and SQL Server with JavaScript, HTML, and CSS to optimize business operations across 6+ departments
- Built and maintained modules for Accounting, HR, Inventory, Sales, Purchases, and Time Management, improving functionality and user efficiency
- Led backend development of a RESTful Point of Sale (POS) system with ASP.NET Web API and SQL Server, powering smooth sales, billing, shift management, menus, and reservations across all POS terminals
- Boosted system performance by refactoring SQL queries and database contexts, achieving a 40% improvement in speed and reduced resource use
- Developed a core backend and UI for a semi-subscription system that centralized all client data using ASP.NET Core and Angular (TypeScript)
- Developed core backend and UI for a semi-subscription system to centralize all client's data using ASP.NET Core and Angular
- Automated report scheduling, enabling users to receive dynamic reports via email without manual effort, by linking reports directly to system screens/methods
- Managed agile workflows using Jira to keep tasks organized, transparent, and on track

Full Stack Web Developer Intern · Mozon Technologies 2021 - 2022

- Built small-scale web projects, gaining proficiency and outperforming peers in learning speed
- Applied modern web development techniques and design patterns to deliver maintainable and scalable code

Education

The World Islamic Sciences & Education University

Bachelor's degree in Software Engineering with an excellent rating

FreeCodeCamp

- Responsive Web Design
- JavaScript Algorithms and Data Structures
- Front End Development Libraries

Skills

Programming Languages

JavaScript (ES6), Typescript, HTML, CSS, C#, SQL

Libraries & Frameworks

React Native (Expo), React.js, Tailwind CSS, Redux, JQuery
ASP.NET MVC & Core & Web API

Methodology

Agile Scrum, Agile Kanban

Tools & Platforms

Git, GitHub, Jira, Netlify

Languages

Arabic, English

Projects

Awkward Game

Mobile Game Cross-platform built with React Native (Expo) and Redux Toolkit. Published on Google Play.

What's The Topic

Mobile Game React Native game using Context API and Async Storage for state and data management. Published on Google Play.

Browser Game Coded in React js, transformed the react native code into react js.
