Relevant Experience

Full Stack Web Developer · **V-tech** Oct 2022 - Feb 2025

- Worked On ERP Systems using C# Asp.net Mvc & Core and Sql Server, with JavaScript, HTML & CSS
- Developed and maintained ERP systems using C#, ASP.NET MVC, and SQL Server, delivering high-performance modules that improved business operations for over 6 departments
- Engineered and enhanced modules for Accountancy, HRS, Inventory, Sales, Purchase and Time Management systems, increasing system functionality and user efficiency
- Led backend development of a complete Point of Sale system using ASP.NET Web API and SQL Server, handling sales, billing, shifts, menus, reservations smoothly for all POS terminals
- Optimized system performance by refactoring queries and merging database contexts, boosting speed and reducing resource usage by 40%
- Developed core backend and UI for a semi-subscription system to centralize all client's data using ASP.NET Core and Angular
- Built automated scheduled report emailing, letting users receive reports in their email without manual work, by dynamically linking reports to system screens and methods
- Managed tasks and project flows using Jira, keeping work organized and transparent

Full Stack Web Developer Intern · **Mozon Technologies** Oct 2021 - Jan 2022

- Worked with the C# library in building small projects, I was informed that I've made progress faster than the other interns
- Implemented applicable modern web programming techniques and design patterns

Education

The World Islamic Sciences & Education University

Bachelor's degree in Software Engineering with an excellent rating

FreeCodeCamp

- Responsive Web Design
- JavaScript Algorithms and Data Structures
- Front End Development Libraries

Skills

Programming Languages

JavaScript (ES6), Typescript, HTML, CSS, C#, SQL

Libraries & Frameworks

React Native (Expo), React.js, Tailwind CSS, Redux, JQuery
ASP.NET MVC & Core & Web API

Methodology

Agile Scrum, Agile Kanban

Tools & Platforms

Git, GitHub, Jira, Netlify

Languages

Arabic, English

Projects

Awkward Game

Mobile Game Coded in react native with expo. used with redux toolkit and many techniques from storing local data to downloading media and using libraries like react native copilot, trying to be clean all the way.

What's The Topic

Mobile Game Coded in react native, Implemented Concepts like Context API, Added Translation and Used Async Storage.

Browser Game Coded in React js, I transformed the react native code into react js.
